

EO MOBILE GUARD

A SECURE SOLUTION FOR MOBILE COMMUNICATION

With EO Mobile Guard, you can proactively counter threats on your mobile network, all over the world. Thanks to special software, your mobile communications will be protected from eavesdropping.

This is a security technology that offers real-time detection of problematic networks (e.g. IMSI Catcher).

When such a network is detected, you will receive an alert, the phone will not connect and will block it.

FEATURES

- > Quickly identify and alert on the presence of dangerous networks, prevent connections
- > Support the latest mobile technology (2G/ 3G/ 4G/ 5G-NSA/ 5G-SA)
- > Available in the latest Samsung Galaxy S23 smartphones
- > Efficient design without compromising battery life
- > Dual SIM support

Ideal for protecting mobile communication

Battery endurance
